APWPT signs Letter of Understanding with the ECC

Brussels / Nuremberg, 18th September 2009 - the ECC (European Communication Committee) and the APWPT (Association of Professional Wireless Production Technologies) signed an agreement on a close working relationship in order to assist the regulatory process in the European Union. Both organizations recognize the need to exchange information and seek, to the extent possible, a common European approach concerning the use of radio frequencies particularly in the field of PMSE (Program Making and Special Events).

“We are pleased to take part in the regulatory process needed to assure that the PMSE Industry can continue producing high quality live entertainment to the benefit of all European citizens” says Matthias Fehr, chairman of APWPT.

APWPT is an international non-profit organisation, which is representing the needs of all users of the Programme Making & Special Event (“PMSE”) sector.

Members of APWPT include PMSE organisations, users and manufacturers. The APWPT directly and indirectly represents far over 25,000 members of the PMSE community in Europe and beyond. PMSE is crucial on a daily basis for the production of content that has received world-wide acclaim and continues to attract a global audience. A vast array of organisations are reliant on radio spectrum for the production of content for Performing Arts, Broadcasting, News Gathering, Independent Film and TV Production, Corporate Events, Concerts, Night Venues, Sports Events, Churches, etc. In addition, other sectors that utilise the current UHF spectrum include the Health Service, Education, Local Government, Political Programming and Conferencing.
