Wireless audio devices operate under a “Class Licence”, meaning that no special approvals or licence is required to operate equipment that meets the following frequency and power specs.

- Use of free frequencies (no approval needed) from 174 - 230 MHz, max. e.i.r.p. 3 mW
- Use of free frequencies (no approval needed) between 520 - 694 MHz, max e.i.r.p. 100mW
- Use of free frequencies (no approval needed) between 1785 - 1800 MHz, max e.i.r.p. 100mW

Operation on the frequencies shown above is as a secondary service, sharing with DTV transmission, on the basis that you do not operate outdoors on the same frequency as a DTV service licenced in the location, and that you operate on a “no interference – no protection” basis.

Application can be made to operate outdoors on the same frequency as a DTV service licenced in the location for special events.

Note that DTV channels are allocated on a “Block Planning” approach in Australia, with 6 consecutive channels, each 7 MHz wide, allocated to each DTV market. This means that in any location there will be at least one complete block of 42 MHz fully occupied by DTV transmission. In some locations more than 1 Block is in use – refer to www.frequencyfinder.com.au for up to date information about VHF & UHF DTV frequency allocation in any area of Australia.

Approval can be requested to operate on higher power levels within these bands for defined “Special Events”

(Preliminary information)

**Individual assignment / License required**

- 174 - 216 MHz, 50 mW ERP, FSB-LT015
- 230 - 250 MHz, 50 mW ERP, FSB-LT001
- 470 - 694 MHz, 50 mW ERP, FSB-LT009 (currently under revision)
- 694 - 703 MHz, 12 mW ERP, FSB-LT016 (currently under revision)
- 733 - 758 MHz, 12 mW ERP, FSB-LT016 (currently under revision)
- 788 - 790 MHz, 12 mW ERP, FSB-LT016 (currently under revision)
- 823 - 826 MHz, 20 mW e.i.r.p. or 100 mW e.i.r.p. for body-worn wireless microphones, FSB-LT017
- 826 - 832 MHz, 100 mW e.i.r.p., FSB-LT018
- 863 - 865 MHz, 10 mW ERP
- 1350 - 1400 MHz, 20 mW e.i.r.p. or 50 mW e.i.r.p. for body-worn wireless microphones, FSB-LT019 (currently in preparation)
- 1518 - 1525 MHz, 20 mW e.i.r.p. or 50 mW e.i.r.p. for body-worn wireless microphones. FSB-LT021 (currently in preparation)

For all frequency ranges above an application is mandatory with a maximum period of frequency assignment of 10 years.

**No individual license required / License exempt frequencies (General license)**

- 863 - 865 MHz, max. 10 mW ERP, SUB-Class 48
- 1785 - 1804.8 MHz, 20 mW e.i.r.p. or 50 mW e.i.r.p. for body-worn wireless, FSB-LT004
- 1880 - 1900 MHz, DECT equipment, 250 mW e.i.r.p.

**Fees**

Fees of € 53 per transmitter will be levied.

*No individual license required / License exempt frequencies*

In the Danish frequency plan some frequency bands have been allocated to be used for wireless microphones. In all of those bands the frequencies can be used without a licence (licence exemption).

- 138.2 - 142.070 MHz, 50 mW ERP, 200 kHz - Only some frequencies are allowed
- 470 - 790 MHz, 50 mW ERP, 200 kHz - White spaces only
  Note: the 700 MHz use is noted to be changed from 2020
- 823 - 832 MHz, 100 mW e.i.r.p. 200 kHz - Handheld only 20mW in 823-826 MHz

License exempt frequencies / No individual license required

- 174 - 230 MHz, max. 50 mW ERP
- 470 - 694 MHz, max. 50 mW ERP
- 823 - 832 MHz, max. 12 mW ERP or max. 60 mW ERP for body-worn wireless microphones
- 863 - 865 MHz, max. 10 mW ERP
- 1785 - 1804.8 MHz, max. 20 mW e.i.r.p. or max. 50 mW e.i.r.p. for body-worn wireless microphones
- 1881.792 MHz + (0…9) x 1.728 MHz, DECT equipment, max. 250 mW ERP.

To get further information on license-exempt radio microphones and frequency selection, see TRAFICOM’s website below.

Regulation on collective frequencies for license-exempt radio transmitters (includes DECT devices) and on their use.

https://finlex.fi/data/normit/44836/Regulation_15AO_EN.pdf

Mandatory application / Applying for a short-term license (PMSE-license)

- The radio microphones will be license-exempted if they operate on the allowed frequencies and accordance with the standard. In cases where parameters of use such like maximum ERP (10 mW - 60 mW) or bandwidth (≤ 200 kHz) deviates from those exempted from license TRAFICOM grants a radio license if necessary to the radio microphone. The radio licenses are applied for from TRAFICOM using the form on the website and TRAFICOM assigns parameters and the frequencies to be used in the radio license.

https://www.traficom.fi/en/contact-form-event-organizers

Fees

- The frequency fee of a license bases on the number of equipment and frequencies used. The frequency fee of a short-term license is at least one fourth of an annual frequency fee but no less than EUR 18.
- Typical fees (for using a bandwidth of 200 kHz):
  - 18 EUR for a single microphone up to 12 months
  - 18 EUR for 8 microphones up to 3 months
  - 65 EUR for 8 microphones up to 12 months

License exempt frequencies / No license required

The access to spectrum for PMSE (wireless microphones, In-Ear monitor systems, talk-back applications) is subject to a licence-exempt regime, authorized by the national regulatory authority ARCEP (Autorité de régulation des communications électroniques et des postes).

Such use is allowed in the following bands and is restricted to professional users.

- 174 - 223 MHz, max. 50mW ERP
- 470 - 694 MHz, max. 50 mW ERP
- 823 - 826 MHz, max. 20 mW e.i.r.p. or max. 100 mW e.i.r.p. for body-worn wireless microphones
- 826 - 832 MHz, max. 100 mW e.i.r.p.
- 863 - 865 MHz, max. 10 mW ERP
- 1785 - 1800 MHz, max. 50 mW e.i.r.p. for body-worn wireless microphones otherwise max. 20 mW e.i.r.p.

No individual license required / License exempt frequencies

In the following bands license exemption applies for frequency usages employing transmit parameters that match license exemption criteria (check the spectrum information system for details via this link; [http://stir.nmhh.hu/?lang=2](http://stir.nmhh.hu/?lang=2)). Otherwise a license has to be asked for and the requested transmission parameters will be subject of thorough investigation (for possible interference), based on which a temporary license might be issued (see note 1):

- 174 - 216 MHz, max. 50 mW ERP
- 470 - 694 MHz, max. 50 mW ERP
- 694 - 703 MHz, 733 - 758 MHz, 50 mW ERP; available until 05.09.2020
- 786 - 789 MHz, 12 mW ERP; available until 05.09.2020
- 823 - 826 MHz, max. 20 mW e.i.r.p. or max. 100 mW e.i.r.p. for body-worn wireless microphones
- 826 - 832 MHz, max. 100 mW e.i.r.p.
- 863 - 865 MHz, max. 10 mW ERP
- 1350 - 1400 MHz, max. 20 mW e.i.r.p. or max. 50 mW e.i.r.p. for body-worn wireless microphones or for use with SSP (Spectrum Scanning Procedure)
- 1492 - 1518 MHz, 50 mW e.i.r.p.
- 1518 - 1525 MHz, 50 mW e.i.r.p.
- 1785-1804.8 MHz, max. 20 mW e.i.r.p. or max. 50 mW e.i.r.p. for body-worn wireless microphones or for use with SSP
- 1880 - 1900 MHz, for DECT equipment, max 250 mW e.i.r.p. (see note 2).

Notes:

1) In fortunate cases when the tuning range of an equipment falls outside the listed frequency ranges but harmful interference will probably not be caused (based on the interference check of the Authority) a license might also be issued. In such cases please request information from our licensing department.

2) Stations fulfilling the requirements of Decision ERC/DEC/(98)22 are exempted from the obligation of individual licensing. It is not forbidden to use the band for audio PMSE although it is originally not meant for this purpose.

Fees

Fees of HUF 4000 per transmitter will be levied (fee of temporary license for shorter than 1 month of operation).

Latvia

According to rules of the Cabinet of Ministers of the Republic of Latvia No. 1151 (interface RS PMSE.01 and table 8.10 and 8.14.2) the following frequency bands can be used for radio microphones:

License exempt frequencies / no license required

- 29.7 - 47 MHz, max. 10 mW e.r.p.
- 863 - 865 MHz, max. 10 mW e.r.p.
- 1785 - 1804.8 MHz, max. 50 mW e.i.r.p. for body-worn wireless microphones
  otherwise max. 20 mW e.i.r.p.
- 1880 - 1900 MHz, max. 250 mW e.i.r.p. (DECT only)
- 2400 - 2483.5 MHz, max. 10 mW e.i.r.p.
- 5725 - 5875 MHz, max. 25 mW e.i.r.p.

Individual assignment / Licence required

- 174 - 216 MHz, max. 50 mW e.r.p.
- 470 - 694 MHz, max. 50 mW e.r.p.
- 823 - 826 MHz, max. 100 mW e.i.r.p. for body-worn wireless microphones
  otherwise max. 20 mW e.i.r.p.
- 826 - 832 MHz, max. 100 mW e.i.r.p.

Fees

In accordance with the Electronic Communications Law Section 50 it is permitted to utilise the radio frequency spectrum for radio equipment operations after the receipt of a radio frequency assignment use permit from the State stock company "Electronic Communications Office" or in accordance with a common radio frequency assignment use permit according to the procedures stipulated by the Cabinet.

Fees are imposed for each permit request consideration and in addition depend from the duration of the use according to rules of the Cabinet of Ministers of the Republic of Latvia No. 652:

1. Consideration of a request for short-time use of radio frequency spectrum
   - EUR 35.57 (single-payment);
2. Providing of EMC for low-power radio equipment on secondary service bases
   - EUR 8.06 per month or proportion to the duration of the use.

New Zealand

No individual license required / License exempt frequencies

Wireless audio devices are permitted to operate in New Zealand between the frequencies of 510 MHz and 606 MHz and between 622 MHz and 698 MHz, under class licence provisions which limit maximum e.i.r.p. to 250 mW and can operate on blocks used by DTV on the “no interference – no protection” basis.

At the time of writing no DTV channels are planned to operate between 622 MHz and 698 MHz from March 11th, 2015, however the lower block between 526 MHz to 606 MHz is used for DTV throughout most of the country. TV Channels in New Zealand are 8 MHz wide, and in some places frequencies of operation start at 510 MHz.

Operation under the General User Licence is as a secondary service, sharing with DTV transmission, on the basis that you do not operate on the same frequency as a DTV service licenced in the location, and that you operate on a “no interference - no protection” basis.

From 11 March 2015, radio microphones (and other wireless audio devices such as in-earpieces) are no longer permitted to operate in the 698-806 MHz frequency range (the 700 MHz band).

Note 1: 502 MHz to 510 MHz may also be used with the maximum power limit of -10 dBW e.i.r.p. which is equivalent to around 100 mW.

Operation under the class licence means there is no need to apply for a licence to operate equipment that complies, and there are no fees or charges applicable.

How to get a short- or long-term license?

Any request for license should be addressed to ANACOM using our virtual desk, available at:
https://www.anacom.pt/bvirtual/bvru/index.do?do=/acesso_direto.do&languageId=1

Fees for a short-term license

For temporary licences, the value of the usage fees to be collected is reached by using the following formula: Applicable annual fee x (no. of days of licence validity / 360 days). For occasional audio links, the applicable annual fee is as follows:

| SAP/SAB -Annual fee | Audio links (per frequency) € 2 250,00 |

We would also like to point out that minimum and urgency (when applicable) fees will be applied. See below:

- Minimum Fee: The value of 50 euros is the minimum value of spectrum fee applicable to stations or networks of each Radiocommunications Service/Application to be used for temporary events.
- Urgency Fee: If the application for temporary licensing is not submitted to ANACOM up to ten days prior to the date on which it is proposed the radio licence should come into force, the applicable fee will be increased by 50% of its value, with a minimum of 75 euros.

All bands, stated in document have technical limitations written in ERC/REC 70-03, 2014/641/EU - Commission implementing decision of EU on PMSE and radio equipment class 1, in particular subclasses SC86 and SC48 for continuous transmissions.

All above radio equipment is allowed to operate on license - exempt and non-interference basis.

Point to point analogue audio links are used in 1518 MHz - 1530 MHz frequency band and they should comply with EN 302 217 EU harmonized standard. For this audio analogue links, our agency is issuing licences (max bandwidth is 500 kHz).

Notes:
- The use of radio microphones in the bands 789 - 823 MHz and 832 - 862 MHz is forbidden.
- Wireless microphones can also operate in some other frequency bands. For example, in the frequency ranges intended for non-specific short-distance radio applications or in the frequency range for DECT (Digital Enhanced Cordless Telecommunications) at 1880 MHz. The technical interface requirements RIR1008 define the frequency ranges and radio parameters for non-specific applications, the RIR0503-01 for DECT in the 1880 MHz frequency range.

Licensed and Unlicensed Operation Permitted

It is permissible to operate wireless microphones and in ear monitoring systems on either a licensed or unlicensed basis in several bands. In the television broadcasting bands, a power limit of 50 mW applies for unlicensed operation; licensed microphones and in ear monitor transmitters may operate with up to 250 mW in the UHF television band.

Wireless microphones may operate on locally unused television channels within the VHF and UHF television broadcasting bands between 54-72, 76-88, 174-216, and 470-698 MHz Note5.

Locally unused television channels may be determined by consulting one of the wireless microphone manufacturers’ online frequency finders, or the website of one of the FCC approved database operators.

Licensed users may register TV channels they intend to use with one of the FCC approved database operators to receive interference protection from White Space Devices operating in the TV bands. Unlicensed users are no longer able to register with a database.

In addition to the television bands, wireless microphones can also operate in one of the three license-exempt (ISM) bands at 902 - 928 MHz, 2 400 - 2 483.5 MHz or 5 725 - 5 850 MHz as well as the UPCS (DECT) band at 1 920 - 1 930 MHz. Microphones operating in these bands have different technical requirements than those for use in the television bands. They are shared with other devices and may be congested at certain times and places.

As a result of the Incentive Auction of UHF (600 MHz) television band frequencies, wireless microphones and in ear monitoring systems must stop operating in the 600 MHz band except in designated guard band frequencies by the end of the transition period on July 13, 2020. Those who do not comply may experience high levels of interference and could also face fines. The 600 MHz frequencies that will continue to be available for wireless microphone use include a 2 MHz guard band from 614 - 616 MHz, plus a 10 MHz portion of the duplex gap from 653 - 663 MHz. The lower 4 MHz of the duplex gap will be exclusively for licensed wireless microphones, and the upper 6 MHz will be shared between wireless microphones and White Space Devices on a co-equal basis. Unlicensed operation will be permitted in 614 - 616 MHz and 657 - 663 MHz, and licensed operation will be permitted in 653 - 657 MHz. The spectrum below Channel 37 will continue to be used for television broadcasting. Wireless microphone users are advised to check with one of the TV Bands databases to determine the available channels at the location where they plan to operate.

Additional spectrum for licensed users is available in the 941.5 – 952, 952.85 – 956.25, 956.45 – 959.85, 1 435 - 1 525, 6 875 - 6 900, and 7 100 - 7 125 MHz ranges Note6. Technical standards for these bands have been finalized. Users must check with a local frequency coordinator before operation begins. There are special conditions for operation in the 1 435 - 1 525 MHz band. Access protocols are currently being worked on with AFTRCC, the coordinator for that band.

Note5: after the current transition phase ends on July 13, 2020, the UHF television broadcasting band will be limited to 470-608 MHz. Wireless microphones will be permitted in the lower guard band at 612-614 MHz and in the duplex gap band from 653-663 MHz.

Note6: the 6 875 – 6 900 and 7 100 – 7 125 MHz bands may be reallocated to other services in the future.

Preliminary remark

‘Site’ License required and issued where frequencies are not used for broadcasting or aeronautical services at a given geographical location – access could be for a limited period or on a long-term basis.

- 470 - 606 MHz, max. 50 mW ERP
- 614 - 790 MHz
- 960 – 1164 MHz – three ‘sub-bands’
- 961 to 1015 MHz
- 1045 to 1075 MHz
- 1105 to 1154 MHz
- 1518-1525 MHz, max. 50 mW ERP

‘Shared’ License required – annual renewal

- 606 - 614 MHz, max. 50 mW ERP
- 823 – 832 MHz, max. 50 mW ERP
- 1785 - 1800 MHz, max 50 mW ERP

No individual license required / License exempt frequencies

- 863 - 865 MHz, max. 10 mW ERP
- 173.8 - 175 MHz max 50 mW ERP
- 2.4 - 2.485 GHz, 10 mW EIRP

Further information

This document is mainly focussing on audio PMSE. However, there are several PMSE in daily use:

Therefore, CEPT/ECO informs on a special homepage about “Programme making and special events applications (PMSE)”: https://www.cept.org/ecc/topics/programme-making-and-special-events-applications-pmse

PMSE contact points and regulatory processes in CEPT administrations: https://www.cept.org/ecc/topics/programme-making-and-special-events-applications-pmse#Contact

In addition, CEPT/ECO provides a frequency database, called “EFIS”. This tool will be updated to improve its usability: https://www.efis.dk/

A similar database “AFIS” is provided by the Asia-Pacific Telecommunity (APT): http://www.aptafis.org/

APWPT summarizes some PMSE information here: https://www.apwpt.org/terminologies-j--p/p/pmse/index.html

Note: information as of March 2020
APWPT - What is our focus?
Secure in long-term production frequencies and the required spectrum quality.

APWPT - What happens now?
In many countries, a decision regarding the 2nd digital dividend has yet to be made.  
-> We want to work actively alongside this development

In countries where a decision has been made, we are working for a quick implementation.

→ We are working for planning security.
→ In many countries and committees, we are supporting
   a discussion of the facts.

The entire industry must now adjust to a new situation and, if need be, invest in suitable tools and methods.

APWPT - Activities?

• Inform decision makers on political and regulatory level on PMSE application and spectrum needs.

• Inform PMSE user on the status and trends in the spectrum discussion.

• Secure PMSE protection against interferers in international organisations on standardisation, e.g. EFSC, ETSI, ECC/CEPT and ITU-R.
